

Bruno Grangé

Summary

Worked extensively with Lotus' products, such as Notes, Domino, Team Workplace (QuickPlace), Workflow, Instant Messaging (Sametime), and Domino Document Manager (Domino.doc). Experienced teaching official IBM training sessions. Expert on web applications development, including new trends like Web 2.0 and SOA.

Total Experience : 8+ years experience in Lotus Products.

O. S. : Windows, Palm, Linux.

Languages : DHTML, JavaScript, CSS, XML, LotusScript, @Formula, Java, WebServices, PHP, ASP, Delphi, Visual Basic, UML.

Databases : DB2, Oracle, MySQL, SQL Server, Access.

Significant Projects

Project Name: IBM Club website

Client : IBM

Duration/Size: Oct 2003 - on going

Role : Analyst / Developer

Environment : Lotus Domino / Web

Start date : 10/2004

Description :

IBM Club website is part of IBM's intranet and internet, and allows people to interact socially in the company with their colleagues and families.

Actually IBM Club brings employees and retirees, as well as their families, together outside of work to participate in activities that are social, cultural or recreational. The IBM Club also makes available discounts to entertainment, leisure and recreational venues and events. The system was built using Domino architecture with multilingual support, and is used per more then 20,000 IBMers in the whole world in a cluster environment. Phone meetings and brainstorming with team colleagues from several parts of the world are very usual in this project. The system is a success, and is considered to be one of the most important benefits to IBM employees in the year of 2005.

Responsibility:

Accomplish project's application development tasks with the global team.

Project Name: Projexx

Client : Cyberlynxx

Duration/Size: Feb 2003 - on going

Role : Architect / Analyst / Developer / Tester

Environment : Lotus Domino / MS Project / Web

Start date : 09/2003

End date : 01/2004

Description :

Projexx integrates MS Project's project management functionalities plus the collaboration and security resources from Lotus Domino. It allows the user to simulate, plan and manage a project thru all phases. It is all deployed in a unique web environment that allows the project manager to take optimal decisions with expertise.

Projexx is the no.1 brand for Cyberlynxx, an IBM Premier Business partner. It was developed using state-of-art web interface that includes sophisticated resources, like its MS Project integration. Its workflow capabilities, rich reports and easy handling are arousing its recognition in the vertical market; turning the product a promise of becoming a best seller.

Projexx is a Lotus Best Choice winner, and has also received other IBM awards.

Responsibility:

Design, develop, test and deploy the whole application.

Project Name: LAHR Community

Client : Coca-Cola Company

Duration/Size: Apr 2003 - Oct 2003

Role : Developer / Tester

Environment : Lotus Domino, Lotus Quickplace and Lotus Sametime.

Start date : 06/2003

End date : 09/2003

Description :

The LAHR (Latin American Human Resources) Community was a software model developed with the intention of dealing with a wide variety of subjects related to HR. It is a Lotus Quickplace theme, totally customized to cater to the HR personnel at Latin America.

The system can work as a corporative notice board, where users are able to create questions and release its results, create news posts, reminders, calendars, VIP clients address books; besides a simple and efficient project management module.

The system implements extreme Lotus Quickplace customizations, and Domino data manipulation via XML, Sametime APIs, servlets, and LotusScript and Java placebots. Among the users, we have directors, managers and coordinators from Coca-Cola. The project was considered to be a success by the LA employees, and will be adopted as a model for HR in the corporation worldwide.

Responsibility:

Design, develop and test the application.

Project Name: SIF

Client : IBM / Canal Futura (Globo's TV associate)

Duration/Size: Sep 2002 - May 2003

Role : Developer / Tester / Web

Environment : Lotus Domino

Start date : 09/2002

End date : 04/2003

Description :

SIF (Sistema Integrado Futura - Futura's Integrated System) was a project that had as a mission to cope with a complex amount of assumptions, all related with TV broadcast. The main activities of the system are controlling broadcast running, managing content acquisition and maintaining the Futura's Network inventory.

Divided into the modules of Acquisition, Tape files and Programming; the system enables the control of all data related to the core of the business of the company.

Due to its complexity, SIF used sophisticated "rich client" resources for not impacting Domino performance and ease of use. For this, we used the very best technologies available for web development, like dynamic web content using AJAX (JavaScript, XML and DHTML).

The system is used by a small number of users who are directly involved with the network main operations.

Responsibility:

Develop and test the application.

Education

Master (stopped):

Engineering (Computer Science) from UNICAMP - Universidade Estadual de Campinas.

Bachelor:

Engineering (Computer Science) from IMB - Universidade Metodista do Rio de Janeiro.

Technical Training:

- IBM Certified IT Specialist.
- IBM Certified Advanced Instructor - **Lotus** Notes and Domino 8, 7, 6-6.5 AD (CLIA R8).
- IBM Certified Associate Developer - **Lotus** collaborative solutions (CLS Quickplace 3).
- IBM Certified Advanced Application Developer - **Lotus** Notes and Domino 8, 7, 6-6.5 (CLPP R8).
- IBM Certified Associate System Administrator - **Lotus** Notes and Domino 8, 7, 6-6.5 (CLS R8).
- IBM Certified Database Associate - **DB2** UDB v8.1.
- IBM Certified **SOA** (Services Oriented Architecture) Associate.
- Undergone training in **Java** and **UML** at Bennett Methodist University.

Project related and other Training:

- Specialist on Lotus Notes application development.
- Ability with development and support in English and Spanish for foreigner clients.
- Expert on Internet application development, including the Web 2.0 and SOA trends (e.g. PHP, ASP, AJAX, WebServices, JavaScript, DHTML, CSS, XML, etc).
- Large knowledge on Lotus customizations (Quickplace, Sametime, Workflow, etc).
- Good programming notions, including RAD and workflow tools.
- Ability with office related software (e.g. Outlook, Draw, Writer, Excel, Project, etc).
- Basic knowledge in server administration using Windows and Linux.
- Experienced with networking infrastructure, including datacenters.
- Notions of telecommunication systems (e.g. PABX, routers, VoIP, tickers, etc).
- Experience of manufacturing systems (e.g. ERP, CRM, CAD and CAM, etc).

Publications:

- **Book:** Best Practices for Building Web Applications for Domino 8. Book created in wiki format by IBM Redbooks and developerWorks for public domain.

Language Proficiency

- Fluency in English language. IELTS certified with overall score band 7.
- Intermediate in Spanish language. Coursed an immersion course by COINED in Buenos Aires - Argentina.
